Professional Summary

Computer Science and Engineering student pursuing an Integrated B.Tech + M.Tech degree with hands-on experience in Python, Java, C, Git, GitHub, AI-powered applications, and software development. Experienced in building and debugging academic software involving API integration, containerization, deployment, CI/CD, and relational data management. Recently gained practical experience in Solidity, Foundry, and Avalanche through hands-on smart contract, NFT, and testnet deployment. Strong foundation in data structures, algorithms, DBMS, operating systems, computer networks, and software engineering.

Education

JNTUH – University College of Engineering, Science & Technology Hyderabad **2024 – 2029**
B.Tech + M.Tech – Computer Science & Engineering, Integrated Dual Degree Program **CGPA: 8.33/10**

Latest Semester GPA: 9.55/10

Relevant Coursework: Data Structures, DBMS, Operating Systems, Software Engineering, Design & Analysis of Algorithms, Computer Networks, Computer Organization & Architecture

Internship Experience

ShadowFox **Sep 2026**
Incoming Full-Stack Developer Intern *Virtual*

- Selected for a 1-month virtual internship focused on project-based software development, mentorship, self-paced learning, and practical problem solving.
- Will work on progressive development tasks, strengthen problem-solving skills through practical challenges, and present the completed project at the end of the program.

Academic Projects

AI-Driven Chatbot as a Virtual Assistant 🤖 *2026*

- Developed an AI-powered virtual assistant integrating Google Gemini for natural-language conversational responses.
- Built and debugged application workflows involving user interaction, backend communication, conversation handling, deployment, and relational data management.
- Worked with Docker, Docker Compose, GitHub Actions CI/CD, Prometheus, and Grafana for containerization, automation, and observability.

Orbital Debris Avoidance Constellation Management System (ODA-CMS) *Academic Team Project*

- Developed a full-stack platform for monitoring a simulated satellite constellation, detecting conjunction threats, and supporting avoidance decisions.
- Implemented 3D orbital visualization, orbit propagation, conjunction threat detection, alerts, and mission analytics.

RailReserve – Railway Reservation System 🚆 *Academic Team Project*

- Developed a full-stack railway reservation system supporting train search, passenger management, ticket booking, cancellation, schedules, booking history, and administration.
- Worked with frontend, backend, and relational data-management components to support end-to-end reservation workflows.

Technical Skills

Languages: Python, Java, C, SQL, HTML, CSS

Development & Version Control: Git, GitHub, GitHub Actions

DevOps: Docker, Docker Compose, CI/CD

Blockchain: Solidity, Foundry, Forge, Cast, Avalanche Fuji Testnet, Smart Contracts

Databases: SQLite, SQLAlchemy, Relational Database Management

Core Concepts: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering, Debugging

Certifications

- Being Infinity – Web Development & Deployment Bootcamp:** Participated in a hands-on web development and deployment workshop covering practical development, Git/GitHub, API integration, and deployment workflows.

Leadership & Activities

- JNTUH-JAC:** Served as 1st Year Coordinator, contributing to student coordination and organizational activities.
- Class Representative:** Served as class representative for three semesters, coordinating academic and student communication.
- QUEST 2025:** Participated in organizing technical workshops conducted by the CSE department.
- Raghavarsha Club / Beatboxing:** Active college music-community participant with 10 years of beatboxing experience and public performance experience.

Honors & Awards

- Team1 University Connect – JNTUH Avalanche Workshop:** Successfully completed **8/8 hands-on tasks** covering Avalanche Builder Hub, Core Wallet, Fuji Testnet, Solidity, smart contracts, NFTs, Foundry, Avalanche L1s, and Cascade.
- First Participant to Complete All 8 Tasks:** Completed all workshop tasks ahead of the other participants and received Team1 merchandise in recognition of the achievement.
